2026.02 Release Notes

Release notes for the 2026.02 release of the Measurand Software.

PROJECT	VERSION	RELEASED VERSION
Raw2Data	5.27.0	Released in 2026.1
SAARecorder	7.98	Released in 2024.02
SAAView	3.7.1	Released in 2026.1
SAASuite	3.9.0	Released in 2026.1
DataChecker	1.49.0	Released in 2024.02
FileGenerator	4.4.0	Released in 2024.02

Here is a list of changes in the software:

Raw2Data 5.27.0

New Features

- Raw2Data now fetches missing ShapeArray calibration files from a new hosting service.

Fixes

- Resolved an issue where position data incorrectly started at a non-zero value. It now initiates correctly from 0,0,0.

SAAView 3.7.1

Fixes

- Resolved an issue causing the application to crash when configuring filter settings for ShapeArrays in specific orientations.

SAASuite 3.9.0

New Features

- SAASuite now fetches ShapeArray calibration files from a new hosting service.
